productronica 2015
innovation all along the line

Visit Armbruster Engineering at Productronica in Munich!

From November 10 – 13 in Munich in **Hall A1 / Booth 253**.

See the production of components under real production conditions at our new trade show exhibit.

Set up as a complete industrial manufacturing system and controlled from our ELAM E4-platform.

The interactive assembly solution already raised a lot of interest at the international industry trade show Motek in Stuttgart.

Many visitors performed assemblies live with the ELAM system and were thrilled by its ease of use.

Come and get excited about Armbruster Engineering solutions in the areas of commissioning, assembly, monitoring, and inspection!

We look forward to seeing you in Munich!

Nominiert für den
PRODUCTRONICA
INNOVATION AWARD 2015
